

Lifecycle stage	Processes involved	Activity data
<b>Raw material acquisition and pre-processing</b>	Includes mining and other relevant sourcing, pre-processing and transport of active materials, up to the manufacturing of battery cells and battery components (active materials, separator, electrolyte, casings, active and passive battery components) and electric or electronic components	Primary activity data voluntary Secondary data may be used
<b>Main product production</b>	Assembly of battery cells and assembly of batteries with the battery cells and the electric or electronic components	Primary activity data mandatory <b>Secondary data must NOT be used</b>
<b>Distribution</b>	Transport to the point of sale	Primary activity data voluntary Secondary data may be used
<b>End of life and recycling</b>	Collection, dismantling and recycling	Primary activity data voluntary Secondary data may be used
